SUPPLEMENTARY INFORMATION:

*Title:* Interstate Movement of Certain Land Tortoises.

*OMB Control Number:* 0579-0156.

*Type of Request:* Extension of approval of an information collection.

*Abstract:* Under the Animal Health Protection Act (7 U.S.C. 8301 *et seq.*), the Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture is authorized, among other things, to prohibit or restrict the interstate movement of animals and animal products to prevent the dissemination of animal diseases and pests within the United States.

The regulations in 9 CFR 93.701(c) prohibit the importation of the leopard tortoise, the African spurred tortoise, and the Bell's hingeback tortoise. APHIS implemented importation restrictions to prevent the introduction and spread of exotic ticks known to be vectors of

heartwater disease, an acute, infectious disease of cattle and other ruminants. For leopard, African spurred, and Bell's hingeback tortoises already in the United States, the regulations in 9 CFR 74.1 allow for their interstate movement for sale, health care, adoption, or export to another country only if they are accompanied by a health certificate or certificate of veterinary inspection.

The health certificate or certificate of veterinary inspection must be signed by an accredited veterinarian, and must state that the tortoises have been examined by that veterinarian and found free of ticks within 30 days prior to movement. Animal owners may use one of several different types of health certificates that are issued at the State level. All documents request the same data, and any may be used and submitted to APHIS.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- (3) Enhance the quality, utility, and clarity of the information to be collected; and
- (4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

*Estimate of burden:* The public burden for this collection of information is estimated to average 1.5 hours per response.

*Respondents:* Accredited veterinarians, business owners, and individuals.

*Estimated annual number of respondents:* 50.

*Estimated annual number of responses per respondent:* 5.

*Estimated annual number of responses:* 250.

*Estimated total annual burden on respondents:* 375 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 17th day of September 2019 .
